

Purpose:

Increase assurance of supply for consistently purchased critical products

What is the Thomas Reserve Inventory Program?

Thomas has the ability to virtually hold inventory for a specific account for a specific quantity of inventory that is not available to other accounts.

- Systematically replenishes from general inventory in an overnight process
- The program supports VMI and general stock request
- Designed to manage consistently replenished products
- Updates monthly based on actual past 3 months demand

How it works:

- **Shared commitment.** You commit to us on the items that matter most to you, and we commit to holding inventory that only you have access to
- **Auto-responsive** to changes in your demand patterns
- **Quarterly reviews** with your Thomas Sales Representative to ensure we are prepared for any upcoming changes in your requirements

What it means to you:

- Assurance of supply
- No change in ordering process, continue to order in the best manner for you, over the web, electronically, or by directly calling our sales line
- Reduced exposure to changes in your demand
- Periodic review of usage and performance
